EXPERIENCE

Technical Game Designer

Jan 2026 – Mar 2026

Student Project: “Grid-Based Tactical RPG Template”

Gnomon School of Visual Effects

Los Angeles, CA

- Implemented A* and Dijkstra path-finding algorithms for a snappable tactical grid
- Created a UI grid generator with UMG for editing, debugging, and visualizing the grid
- Authored animation blueprint templates with support for classes, units, and equipment
- Organized data in spreadsheets and structures to drive item, weapon, and unit attributes
- Used AI tools such as Claude Code to refactor and prototype scripts

Technical Game Designer

Jan 2025 – Jun 2025

Student Project: “Fallen Valkyrie: Soulslike Boss Level Vertical Slice”

Gnomon School of Visual Effects

Los Angeles, CA

- Designed a Soulslike combat system in Unreal Engine with combat, dodges, and weapons switching
- Architected a multi-phase Boss AI that adapts to player actions with StateTree
- Laid out a linear level with gated progression, blocking volumes, and level blueprinting
- Used Enhanced Input to design character controls integrated with camera transitions (3C's)

Technical Game Designer

Jun 2024 – Dec 2024

Student Project: “Starshore: Open-World Game Prototype”

Gnomon School of Visual Effects

Los Angeles, CA

- Designed array-based visual inventory system with ability to sort, filter, and view details for items
- Procedurally generated foliage and terrain with foliage volumes and material instances
- Implemented player and enemy abilities, stats, and visuals with the Gameplay Ability System (GAS)
- Created animated ranged and melee mobs with Behavior Trees
- Generated filler art assets with Photoshop and Stable Diffusion Automatic1111 web-ui
- Automated node-based AI upscaling of textures and icons with chaiNNer and AnimeSharpV4

EDUCATION & PROFESSIONAL DEVELOPMENT

University of Southern California – School of Cinematic Arts

Los Angeles, CA

Master of Science: Game Design and Development

Jun 2028

Relevant Coursework: Game Development for Designers, Design for Interactive Media

Gnomon School of Visual Effects

Los Angeles, CA

Bachelor of Fine Arts: Digital Production, Concentration in Games

Jun 2025

Relevant Coursework: Game Creation, Level Design, Houdini, Animation for Games, Environments for Games

ADDITIONAL

Technical Skills: Unreal Engine, Unity, Blueprints, C++, C#, Python, Git, Maya, Substance Suite, Photoshop, Illustrator

Languages: English (Native), Mandarin Chinese (Fluent)
