LEFI SHAN

Legal name: Kevin Shan | 3D ENVIRONMENT & TECHNICAL ARTIST

Los Angeles, CA | +1 626 693-4003 | leficious@gmail.com | LinkedIn | itch.io | GitHub
Portfolio: leficious.com/gallery | Watch reel

Stylized 3D environments built through blockout, modeling, procedural materials, foliage, vista lighting, and realtime scene assembly in Unreal Engine 5, supported by Python/Maya API tooling.

SELECTED ENVIRONMENT WORK

Sacred Forest — 2026

Solo realtime scene | Unreal Engine 5, Maya, ZBrush, Substance 3D | Original concept by En Moroldo

• Built the scene from greybox blockout, modular low-poly assets, and a sculpted shrine through procedural stone and bark materials, foliage atlases, warm-vs-cool vista lighting, Niagara VFX, and final UE5 assembly.

• Used Runtime Virtual Textures (RVT) to blend foliage and terrain seamlessly; automated custom vertex-normal transfers in Maya for consistent stylized lighting across trees, bushes, and grass.

Water Blossoms — 2026

Environment & procedural snow | Unreal Engine 5, Houdini, SpeedTree, Gaea, Substance | Character by Idafaber

• Modeled and textured the central bridge landmark; generated procedural snow accumulation in Houdini, terrain in Gaea, and stylized cherry-blossom foliage in SpeedTree with realtime UE5 lighting.

Alien Landscape — 2025

Environment modeling and procedural assembly | Maya, Houdini, Redshift

• Modeled modular environment assets, procedurally scattered and instanced them in Houdini, and completed look development and atmospheric lighting in Redshift.

Stylized Classroom - Illustration Match — 2024

3D environment implementation | Maya, Substance 3D Painter, V-Ray | Illustration by ArseniXC

• Translated a 2D illustration into a 3D architectural scene from greybox blockout to final render, matching its perspective composition, stylized materials, and directional sun/bounce lighting.

RELATED TECHNICAL ART & PIPELINE TOOLS

Stylize Normals Toolkit v3.0 — 2025-26

Maya, Python, Maya API | Open-source foliage and vertex-normal toolkit

• Developed a multi-target Maya toolkit for ovoid projection, custom proxy mesh transfer, directional normal blending, live viewport preview/comparison, and batch normal repair with one-step undo.

EDUCATION

University of Southern California | M.S., Game Design and Development | Expected May 2028
Gnomon School of Visual Effects | B.F.A., Digital Production - Games (Featured in Student Reel) | June 2025

TOOLS AND PRODUCTION

Environment & 3D: Unreal Engine 5 (RVT, Foliage, Niagara), Maya, ZBrush, Substance 3D Painter & Designer, Houdini, SpeedTree, Gaea

Rendering & Technical Art: V-Ray, Redshift, Python, Maya API, MEL, HLSL/URP shaders, procedural materials, foliage cards, UVs, high-to-low poly baking, Photoshop

AI-Assisted Workflows: Stable Diffusion (ComfyUI, Automatic1111), chaiNNer (texture/image upscaling), Meshy AI (rapid 3D mesh blockouts), Antigravity, Codex
