

# LEFI SHAN

**Legal name: Kevin Shan | 3D ENVIRONMENT ARTIST**

Los Angeles, CA | +1 626 693-4003 | [leficious@gmail.com](mailto:leficious@gmail.com) | [LinkedIn](#)

Portfolio: [leficious.com/gallery](https://leficious.com/gallery) | [Watch reel](#)

Stylized 3D environments built through modeling, materials, foliage, lighting, and realtime scene assembly in Unreal Engine.

## SELECTED ENVIRONMENT WORK

---

### Sacred Forest

2026

Solo realtime scene | Unreal Engine 5, Maya, ZBrush, Substance | Original concept by En Moroldo

- Built the scene from modular low-poly assets and a sculpted, baked shrine through procedural stone and bark materials, foliage, lighting, VFX, and final Unreal assembly.
- Used an atlas for foliage and Runtime Virtual Textures to blend plants with terrain; automated vertex-normal transfers in Maya for consistent stylized lighting across assets.

### Water Blossoms

2026

Environment contribution | Unreal Engine, SpeedTree, Gaea, Substance | Character by Idafaber

- Modeled and textured the bridge; developed the surrounding scene through set dressing, lighting, landscape work, and procedurally generated SpeedTree vegetation.

### Alien Landscape

2025

Environment modeling and procedural assembly | Maya, Houdini, Redshift

- Modeled the scene's individual assets, procedurally instanced them in Houdini, and completed look development and rendering in Redshift.

### Stylized Classroom - Illustration Match

2024

3D environment implementation | Maya, Substance 3D Painter, V-Ray | Illustration by ArseniXC

- Translated an existing illustration into a 3D scene, matching its composition, stylized materials, and lighting in the final render.

## RELATED TECHNICAL ART

---

### Stylize Normals Toolkit

2025-26

Maya, Python, Maya API | Open-source foliage and vertex-normal tool

- Expanded the foliage-normal workflow into a reusable toolkit with generated direction, transfer, preview, comparison, and batch repair controls.

## EDUCATION

---

**University of Southern California** | M.S., Game Design and Development | Expected 2028

**Gnomon School of Visual Effects** | B.F.A., Digital Production - Games | 2025

Work selected for Gnomon's student reel.

## TOOLS AND PRODUCTION

---

**Environment:** Unreal Engine 5, Maya, ZBrush, Substance 3D Painter and Designer, SpeedTree, Gaea, Houdini

**Rendering and technical art:** V-Ray, Redshift, Photoshop, Python, Maya API, procedural materials, foliage, UVs and baking
